

Datasheet

Data Access Governance

Benefits

The Lepide Data Security Platform gives organizations the ability to monitor and review access rights across key platforms in an easy, scalable way. Protect your data and meet compliance by ensuring the right people have access to sensitive data.

Enforce Zero Trust

Ensure that your sensitive data is only accessed by those users that have a legitimate business reason to do so.

Protect What Matters

Determine where your most sensitive data is, who has access to it and what your users are doing with it to ensure data protection.

Spot Excessive Permissions

Spot those users that have excessive permissions to your most sensitive data and take the steps required to revert to the principle of least privilege.

Key Features

Daily Activity Summaries

Get a consolidated view of the interactions and user behavior around your most sensitive data. You can also see permissions changes such as Security Group modifications, Mailbox Permission Changes and file/folder permission changes. .

Critical Real Time Alerts

Dashboards are updated in real time, summarizing risk as and when it occurs. This means you can configure contextual alerts based upon what poses the biggest threat around your data and the critical systems governing access to the data.

Spot Unwanted Access Attempts

With visual representations of both failed logons and failed access attempts to your systems and data you are able to quickly determine whether users are trying to access data that they do not have the privileges to.

Easily Spot Excessive Permissions

Through a pre-defined report, you can spot cases of over-privileged users and groups that may lead to a higher chance of a data breach taking place.

Mobile App

Live Feed of changes as they happen. Designed to work on any Apple or Android enabled device. Enables you to track changes on the go.
