## 2. Pre-Requisites for Installation

Before you start installing the Lepide Software Asset Management tool, make sure that your computer meets the following requirements.

### 2.1 Minimum System Requirements

- Pentium Class Processor
- 128 MB RAM (256 recommended)
- 20 MB of Disk Space for Software installation

### 2.2 Supported Platforms

- Windows 95
- Windows 98
- Windows ME
- Windows NT
- Windows 2000
- Windows 2003

- Windows XP
- Windows Vista
- Windows 7
- Windows server 2008
- Windows Server 2000/2003/2008/2008 R2

### Supported SQL Servers

- SQL Server 2000/2005/2008/2008 R2
- SQL Server Express 2005 / SQL Server Express 2008

## 2.3 User Access Privilege

- User should have administrative rights to access the network computers.
- A proper logon credentials (username and password) is required for each system in the network to have access. Properly logged on computer will be scanned properly later on.
- An administrator can have access to computers in different domain or workgroup hence, with admin rights all system in the network (Domain/Workgroup) are scanned.
  - In case of local user (no administrative rights), read and write access should be there. Such user will not have access to the computers of other domain/workgroup. For system of same domain/workgroup this user may logon successful on providing right username and password but scan is not performed for the system. In this case the system running this software will only be scanned.

## 3. Installing Lepide Software Asset Management software

Download Lepide Software Asset Management Software from our website and save it to a disk location. Also make sure that the host computer meets the entire system requirements and has sufficient memory available.
