- Health Monitoring of
 - Active Directory
 - Exchange Server
 - SQL Server
- Capturing backup snapshots and restoring the state of objects of
 - Active Directory
 - Group Policies
- Active Directory Cleanup
- User Password Expiration Reminders

1. New Additions

Let us have a look at the new additions in the new version 15.4 of LepideAuditor Suite.

1.1 Active Directory Cleaner

Earlier an individual Lepide product, Active Directory Cleaner is now a component of LepideAuditor Suite. Now, Auditor Suite scans for the inactive user and computer accounts, notifies the administrator, and performs the actions automatically against these obsolete accounts.

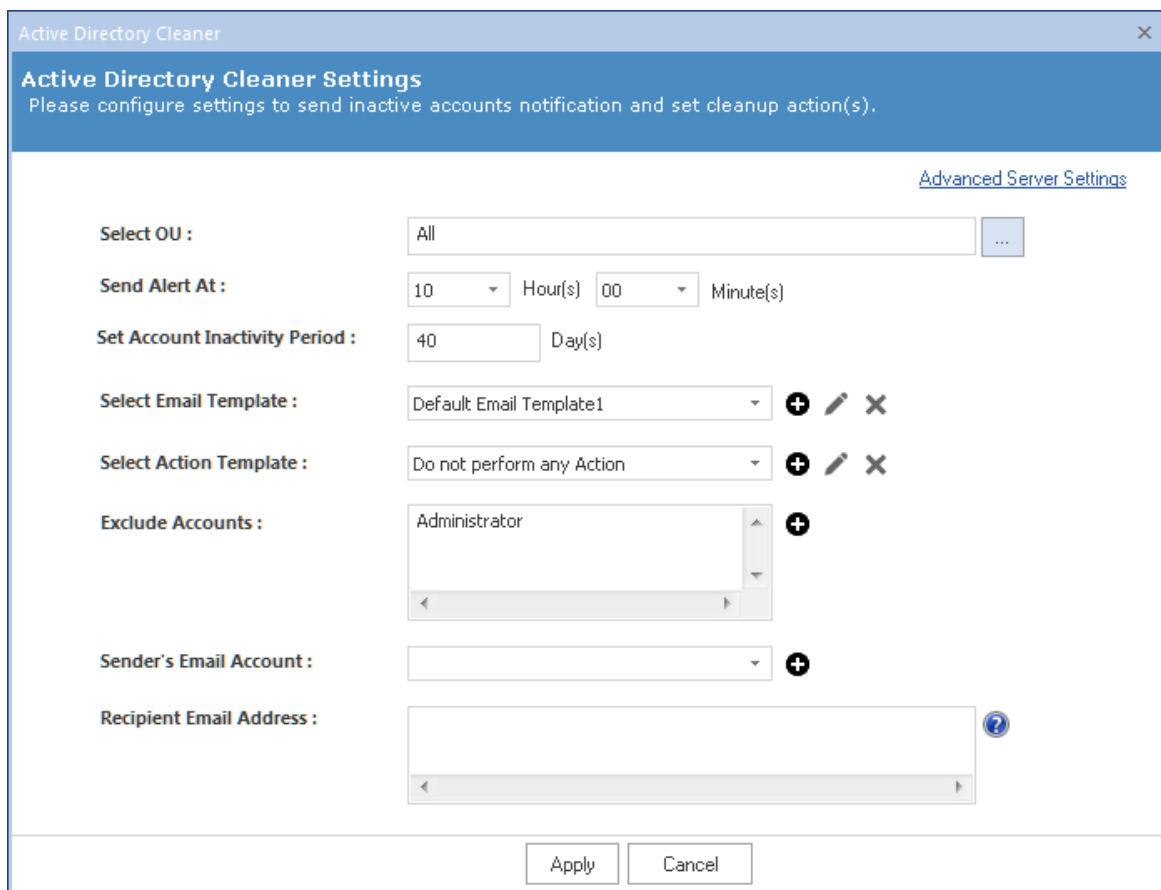

Figure 1: Active Directory Cleaner

Administrator can select any of the following actions and set inactivity period for each action individually.

1. Set Random Passwords after __ days
2. Disable account after __ days
3. Move to _____ OU after __ days
4. Delete Account after __ days

Action Template Settings

Create or modify action template by selecting the actions to be performed on inactive accounts.

Select Action Template : <New>

Action Template Name : Action on Inactivity

Account Type : USER/COMPUTER

Set Random Password After 15 Day(s) Notify Administrator

Disable Account After 30 Day(s) Notify Administrator

Move to OU After 35 Day(s) Notify Administrator

OU Name : OU=Inactive Accounts,DC=www,DC=vdoc,DC=com ...

Delete Account After 95 Day(s) Notify Administrator

OK Cancel

1.2 User Password Expiration Reminder

Earlier an individual Lepide product, User Password Expiration Reminder is now a component of Lepide Auditor Suite. With this new addition, Auditor Suite can now send periodic notifications to the users whose passwords are going to expire. The software sends instant notifications to the administrators regarding the users with soon to expire or expired passwords.

1.3 Threshold Limit

Threshold limit is now added for email alerts, mobile App notifications, and LiveFeed updates. You can define the threshold while creating an alert at the step of applying filters.

1.4 New Graphs and Reports

Two new graphs of Active Directory Cleaner and User Password Expiration Reminder have been added to the Domain Tab in Radar. In addition to the earlier 270+ reports, new audit reports have been added for these two new components.
