What's New in Lepide Exchange Recovery Manager 15.0

This document describes the new and enhanced features of Lepide Exchange Recovery Manager.

Table of Contents

Introduction

Lepide Exchange Recovery Manager is a complete disaster recovery, backup restoration, and Exchange to Exchange/Office 365 migration solution. Software allows you to search, export and recover mailboxes and granular items from EDB, Live Exchange Server and OST files. It is available in multiple language setups such as English, German and French languages.

Software saves considerable cost in small migrations and also ensures business continuity by unlocking damaged Exchange database. You can perform faster restoration without using extra resource and man power.

Prominent feature of software are:

- ✓ Restoring EDB files.
- ✓ Email Search
- ✓ Exchange Server Migration
- ✓ EDB to PST conversion
- ✓ Backup extraction
- ✓ Supports Office 365 migration
- ✓ Extract attachments and logs

New Additions

1. In the latest versions you can add Office 365 in the source for migrating it to Live Exchange Server or other Office 365 mailbox.

   Following is a list of operations that you can perform with Office 365 in source:

   - ✓ Export mails form List view
   - ✓ Export mails form Tree view
   - ✓ Export Multiple Mailbox(s) in PST(s)
   - ✓ Open mails
   - ✓ Copy mails to Destination from List
   - ✓ Copy mails to Destination from Tree
   - ✓ Export Attachment form (Tree, List, Preview)
   - ✓ Report generation
   - ✓ Search emails
   - ✓ Copy, Open, Export ,Export Attachment of the search result
2. Export multiple mailboxes from source in separate PSTs.
