1 How to Configure the Send to SIEM Option

The Send to SIEM option is available for Change Alert and Threat Model Alert Configuration and is configured as follows:

1. From the Web Console Home screen, select **Lepide Detect**
2. From the Lepide Detect Dashboard, select **Lepide Detect, Alert Configuration**

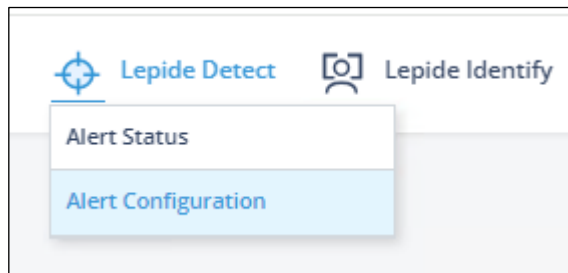

Figure 1: Lepide Detect Menu

The Alert Configuration screen is displayed

3. From the Alert Configuration screen, select the **Email Settings** tab
4. Click the **Add** button and select **Add SIEM Account**

 A screenshot of the 'Alert Configuration' screen in the web console, specifically the 'Email Settings' tab. The screen features a navigation bar at the top with various system icons and a search bar. Below the navigation, there are two tabs: 'Threat Models' and 'Email Settings', with 'Email Settings' being the active tab. A '+ Add' button is located in the top right corner. The main content area contains a table with the following columns: 'Account Name', 'Type', and 'Details'. The table lists several accounts, including 'user1', 'my Account', 'Rishabh', 'My DB', 'Alpha', 'www', 'Zero', 'SIEM2', 'SIEM1', and 'One'. Each row provides specific details for the account, such as the sender's email, login server, and port. To the right of each row, there are icons for editing and deleting the account.

Account Name	Type	Details
user1	Email	Display Name: user1 Sender's Email: rishabh.shishodia@in.lepide.com Login: Server: 192.168.30.168 SSL Connection: false Port: 25
my Account	Email	Display Name: my Account Sender's Email: rishabh.shishodia@in.lepide.com Login: Server: in.lepide.com SSL Connection: false Port: 25
Rishabh	Email	Display Name: Rishabh Sender's Email: rishabh.shishodia@in.lepide.com Login: Server: 192.168.30.168 SSL Connection: false Port: 25
My DB	Email	Display Name: My DB Sender's Email: govindsharma@in.lepide.com Login: Server: in.lepide.com SSL Connection: Port: 25
Alpha	Email	Display Name: Alpha Sender's Email: rishabh.shishodia@in.lepide.com Login: Server: 192.168.30.168 SSL Connection: false Port: 25
www	SEIM Account	Display Name: www IP Address: 192.168.30.168 Port: 12 CEF: False
Zero	SEIM Account	Display Name: Zero IP Address: 192.168.30.168 Port: 21 CEF: False
SIEM2	SEIM Account	Display Name: SIEM2 IP Address: 192.168.30.168 Port: 22 CEF: False
SIEM1	SEIM Account	Display Name: SIEM1 IP Address: 192.168.30.168 Port: 23 CEF: False
One	SEIM Account	Display Name: One IP Address: 192.168.30.168 Port: 19 CEF: False

Figure 2: Email Settings

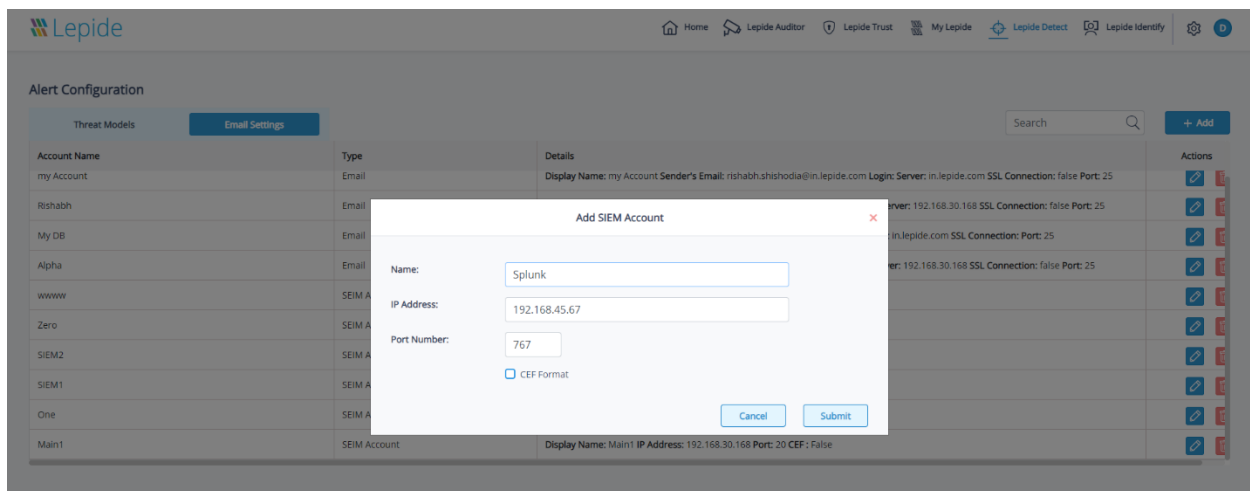

Figure 3: Add SIEM Account

5. The **IP Address** and **Port Number** need to be created from the SIEM device to input into these mandatory fields
6. The port needs to be open one way from Lepide to the device machine
7. Click **Submit** to create the alert
8. Select the option **Send Alert to SIEM** from the Select Alert Action drop down menu
9. Select the SIEM account (Recipients) and click **Done** when finished

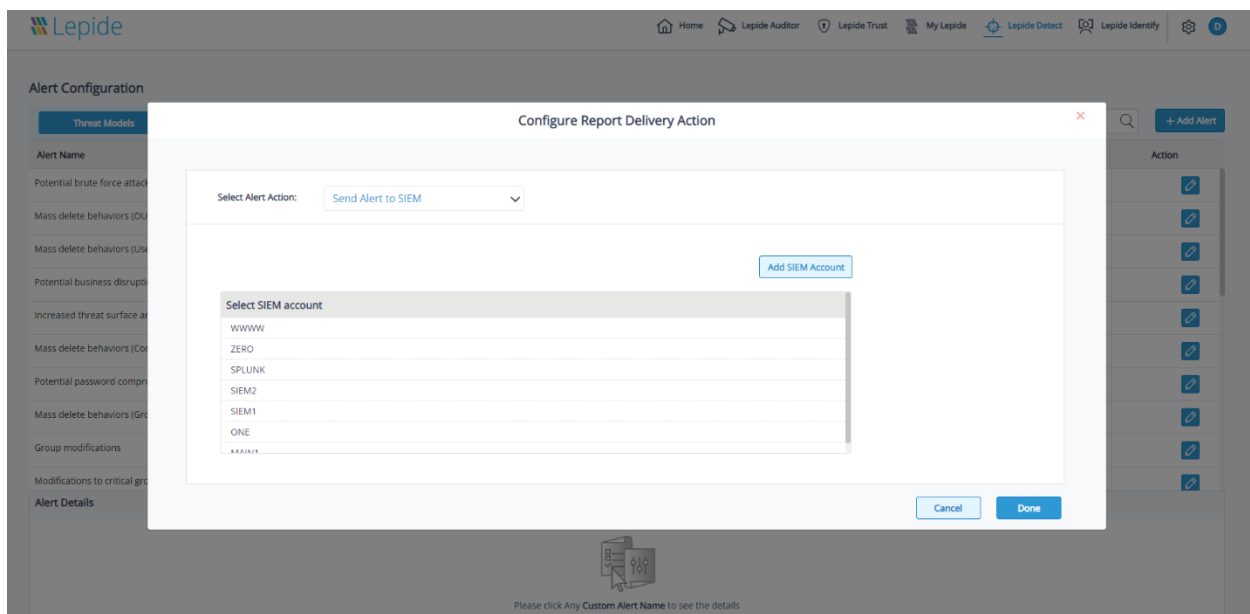

Figure 4: Configure Report Delivery Action

- SIEM is now supported for all components in Threat Models and Change Alerts
- Feeds are created once an alert is triggered as per the alert configuration, and they are pushed to the SIEM account
- CEF format is also supported
