Lepide Data Security Platform

USER AND ENTITY BEHAVIOR ANALYTICS
1. Introduction

Welcome to the User and Entity Behavior Analytics document for Lepide Data Security Platform.

With Lepide, you can identify single point anomalies to easily understand when users are doing something that is outside of normal behavior. The UEBA section within Lepide Data Security Platform allows you to determine exactly why something has been flagged as unusual based upon numerous factors including, time, event criticality, operation and location.

Analyze user behavior based upon a predefined learning period to accurately identify potential insider threats.

2. Purpose of this Document

The purpose of this document is to take you through the configuration of User and Entity Behavior Analytics in Lepide Data Security Platform and give you a glimpse of how the User and Entity Behavior Analytics can help you solve business problems.

3. Configuring the Module

User and Entity Behavior Analytics can be configured by following the below steps:
3.1 Select the Component

Select the component in this filter as per your requirement. There are 2 choices available: File Server and Active Directory.

![Figure 1: Selecting the component](image1)

3.2 Define a Learning Period

In this step, define a learning period for the solution to study the changes and the trends from your environment. We recommend to keep this period as long as you can. The more time the solution will get to study, the more accurately it can spot the anomalies in the components.

![Figure 2: Defining a learning period](image2)

3.3 Select the Analysis Period

Now, select the period in which you want the solution to spot the anomalies for you. The solution will look for any unfamiliar events in this period and report back to you all the changes which have never been seen before.
3.4 Select the User to be Analyzed

In this section, you need to select the user whose behavior is to be analyzed by the solution. The solution will give you a list of users who have done changes in the learning period and you would need to select a user from the list.

3.5 Generate Report

Click on the generate report option now to enable the solution to trace all the changes and report back with the anomalies if they are found.
4. Support

If you are facing any issues whilst installing, configuring or using the solution, you can connect with our team using the below contact information.
