# Lepide Event Log Manager

Lepide Event Log Manager provides a simple, yet comprehensive way or collecting, organizing, archiving and reporting based on event logs we collect. From a single console you can easily browse the logs, create real time alerts for specific events and run countless reports or create your own. It's been designed to help address common challenges surrounding IT security, systems management and regulatory compliance.

Key Features

- ❏ Collect and consolidate Windows and W3C event logs from across the network and get quick insights.

- ❏ Logs are stored in a secure, centralized place so that they cannot be deleted or tempered with.

- ❏ Provides real time alerts to inform you of security breaches, performance and health problems, and compliance glitches.

- ❏ All event logs are stored and managed from one place.

- ❏ You can search and filter in the years of log repository for a single piece of information

- ❏ Comprehensive reporting for security, system management and compliance standards like ISO, PCI, SOX, HIPAA, and GPG 13
