# LepideAuditor

## Benefits

Ensure that you are able to proactively and continuously audit, monitor and alert on changes to systems, configurations and data. With LepideAuditor, you can audit any change made on-premise or in the cloud to help you improve visibility, security and compliance-readiness.

### **Audit On-Premise and Cloud Platforms**

Audit changes being made to the widest variety of platforms provided by any vendor on the market. Covered platforms include Active Directory, File Server, Group Policy, Exchange, SQL, SharePoint Office 365, Dropbox, G Suite and Amazon S3 and many more.

### **Real Time Alerts and Pre-Defined Reports**

Report and alert on changes being made that could affect your security and compliance posture. With over 300 pre-defined reports and real time alerts (based on a single event or threshold condition) never miss a critical change.

### **Prove Compliance**

LepideAuditor comes pre-packaged with hundreds of reports designed to help your organization meet numerous security and compliance requirements, including GDPR, HIPAA, CCPA, SOX, PCI, FISMA, GLBA and more.

## Key Features

### Improve Threat Detection & Response

Get a consolidated view of the interactions and user behavior around your most sensitive data. You can also see permissions changes such as Security Group modifications, Mailbox Permission Changes and file/folder permission changes. .

### Restore and Roll Back Unwanted Changes

Speed up and simplify the process of restoring unwanted changes back to their original state. LepideAuditor captures regular backups of objects in AD and Group Policy, so that you can restore changes in a single click.

### Reduce Downtime and Avoid Disruption

Audit changes to the health of your critical servers and audit changes to configurations to ensure that you can maintain system uptime.

### Universal Auditing

Lepide covers the broadest range of cloud platforms in the industry today, giving you visibility over what matters to you.

### Avoid Compliance Fines

Producing the required reports to satisfy auditors can be a time consuming and complex process. With Lepide, you can produce compliance-ready reports in a single click.

### Mobile App

Live Feed of changes as they happen. Designed to work on any Apple or Android enabled device. Enables you to track changes on the go.
