

Our awarded solution provides a scalable means to instantly see who, what, where and when changes are made to your Active Directory. It sends real time alerts and provides detailed reports to help with all manner of security, system management and security challenges. Aside from alerting and reporting, this solution also offers a single click rollback feature, integrated HealthCheck monitoring of Active Directory, and a simple way of tracking and managing inactive user accounts and about to expire user passwords.

Active Directory

Intuitive Dashboard

- ✓ Quickly identify changes made to Active Directory with our 360 view
- ✓ Instantly see a summary of changes made per administrator, source and trend to help you identify change / event anomalies
- ✓ Easily organize changes by criticality or source

Powerful Searches

- ✓ Simplify complex searches with our logical and intuitive interface
- ✓ Instantly find what you need with custom searches and filters

Real Time Alerting

- ✓ Easily create alerts when specified events occur
- ✓ Quickly identify anomalies with threshold alerts
- ✓ Instantly receive real time alerts straight to the app, console or a specific email address

Granular Reporting

- ✓ Easily see what's changed with a single log for a single change
- ✓ Instantly give context to changes with before and after values
- ✓ Effortlessly find the report you need with over 90 pre-defined reports for systems management and compliance

Roll Back Changes

- ✓ Instantly roll back of changes made to Active Directory with a single click
- ✓ Immediately return everything to exactly as it was before the change

Mobile App

- ✓ Instantly see changes as they happen with our LiveFeed
- ✓ Designed to work on any Apple or Android enabled device

Awards
