

LepideAuditor audits and monitors changes to your AD and GPO, and allows you to roll back any change to its previous state, leaving all attributes and properties of the object to exactly how it was before. You can restore from either our snapshot feature, which takes regular state in time views of the current state of your Active Directory and Group Policy, or a tombstone.

Active Directory

Group Policy

- ✓ Offers optional restore from snapshot or tombstone feature
- ✓ Restores everything to the way it was before the change, such as memberships, passwords and attributes
- ✓ Roll back changes with just a single click and let our intuitive wizard do the rest

Awards

Basic System Requirements

- Dual Core Processor or higher processor
- Recommend RAM - 8 GB
- Required free disk space:
 - Minimum 1 GB
 - Recommended 2 GB
- Any of the following 32 bit or 64 bit Windows Operating Systems: Windows 7 / Windows 8.1 / 8 / 10 / Windows Server 2003 / Windows Server 2003 R2 / Windows Server 2008 / Windows Server 2008 R2 / Windows Server 2012 / Windows Server 2012 R2
- .NET Framework 4.0 or later
- Any of the following SQL Servers (local or network hosted) for storing auditing logs: SQL Server 2005 / SQL Server 2008 / SQL Server 2008 R2 / SQL Server 2012 / SQL Server 2014 / SQL Server 2016 / SQL Server 2005 Express Edition / SQL Server 2008 Express / SQL Server 2008 R2 Express / SQL Server 2012 Express / SQL Server 2014 Express

Supported Windows and Servers

Windows OS Platforms:

- Windows Server 2003 / Windows Server 2003 R2 / Windows Server 2008 / Windows Server 2008 R2 / Windows Server 2012 / Windows Server 2012 R2

Prerequisites

- Following are the prerequisites to audit Windows Server 2003 and Windows Server 2003 R2 (both 32-bit and 64-bit versions):
 - .NET Framework 2.0
 - Windows PowerShell 2.0
 - GPMC.MSC
 - Hotfix of <http://support2.microsoft.com/hotfix/KBHotfix.aspx?kbnum=941084&kbIn=en-us> for Windows Server 2003
- Event Viewer of domain controller(s) and main domain, to be audited, should be accessible.
- Windows PowerShell 2.0 should be installed on server with agent.
