

LepideAuditor for Office 365 (Exchange Online & SharePoint Online)

Office 365 (Exchange Online and SharePoint Online) already has more than 75 million users worldwide and this figure is growing at an exponential rate. There are many positives to Office 365, including increased productivity at reduced costs. However, unauthorised configuration changes by users can sometimes lead to downtime and financial damage. To prevent such incidents, full visibility into changes happening in your Office 365 environment is required; and this can be achieved through auditing. LepideAuditor is an Office 365 auditing solution that enables you to audit changes being made to this cloud platform, in order to help meet compliance, increase security and streamline IT operations concerns.

Office 365 (Exchange Online and SharePoint Online)

Audit Reports

- ✓ Over 70 predefined reports to audit every Exchange Online & SharePoint Online configuration change
- ✓ Detect changes in Policies, Unified Messaging, Remote domain lists, documents, folders, permissions, site collection and groups
- ✓ Pre-defined compliance reports for PCI, HIPAA, GLBA, FISMA, SOX and GDPR

Analyze Permission Changes

- ✓ In-depth auditing of permission changes in Exchange Online & SharePoint Online
- ✓ Send real-time or threshold based alerts on every permission change via email, updates to the LiveFeed or notifications to the LepideAuditor App
- ✓ Enables you to take corrective measures whenever unwanted access privileges or administrative rights are granted to any user

Give Context to Raw Logs

- ✓ Process raw audit logs to show necessary information in audit reports
- ✓ Get answers to the "who, what, when and where" questions
- ✓ Share reports with selected recipients through email or file sharing
- ✓ Delegate reports to selected users through a secured Web-based console

Real-Time or Threshold Alerts

- ✓ Get real-time or threshold alerts as emails to any recipient or as push notifications to the LepideAuditor App
- ✓ Define risks for your organization to serve your security needs
- ✓ Generate threshold based alerts whenever multiple change events occur over a predefined interval to help detect suspicious changes

Awards
