# LepideAuditor for Dropbox

Lepide

Dropbox Business is a file hosting service that encourages collaboration through content creation, access and sharing. As millions of users share business-related content through Dropbox Business, it is important that you are constantly monitoring any changes that are taking place to file, folders and permissions, as well as getting insight into when sensitive data is shared. This is exactly what LepideAuditor enables you to do. Advanced filters give you all the tools you need to improve the security of Dropbox.

Insights into Dropbox Link Sharing

✓ Easy to configure reporting to help ascertain all user activity around the files being shared through Dropbox.

✓ Visibility around Files being deleted, added, renamed moved or even copied

✓ Complete audit trail of how your business users are interacting with your company's data.

Track Changes to Files and Folders

✓ Insight into how and when your business data is being shared to identify the early warning signs of a data breach

✓ Powerful filtering options enable you to quickly get a consolidated view of all activity around Dropbox link sharing, who shared the links and when.

Monitor Permissions to Critical Data

✓ Understand who has access to the data as well as who has elevated privileges to make changes to the groups surrounding the data

✓ Insight into how groups are modified, if members are added to groups as well as if team members are added or removed

✓ Ensure the right permissions and access levels are set across the content shared through Dropbox.
