Lepide Active Directory Self Service

Password Synchronization Configuration for Office 365

In order to configure password synchronization of Office 365, perform the following steps:

1. Download and install the Microsoft Online Services Sign-In Assistant (beta or higher version)

2. Download and install the Windows Azure AD Module for Windows PowerShell (4 or higher version)

3. Upon successful installation, go to the following path

   `C:\Windows\System32\WindowsPowerShell\v1.0\Modules`

4. Move the folders named '**MSOnline'** and '**MSOnlineExtended'** from there `to`

   `C:\Windows\SysWOW64\WindowsPowerShell\v1.0\Modules`

You can check the installed version in PowerShell to verify it.

1. Open the 'Run' command by typing 'Windows+r' button

2. Type PowerShell in it and press 'Enter'. Windows PowerShell will open up.

3. Type **$PSVersionTable** and press 'Enter'.

4. The result will provide the version details.
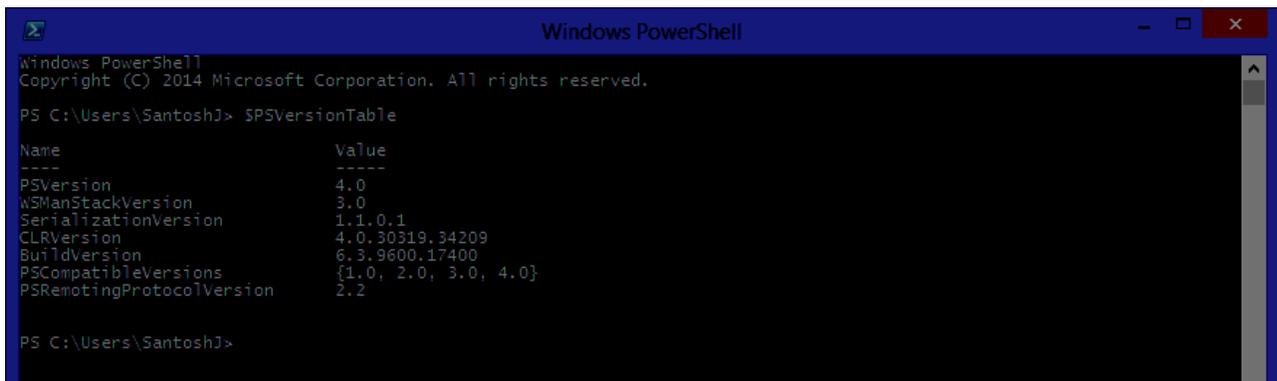

Now provide Office 365 details in Lepide Active Directory Self Service to enable password synchronization.
