1. Introduction

The purpose of this document is to detail the prerequisites required in order to successfully install and configure the Lepide Data Security Platform. The steps outlined within the document are to be completed ahead of the first configuration session.

2. Deployment Options

2.1 Virtual Appliance (recommended for trial)

- a. Download Lepide Virtual Appliance by clicking [here](#) and filling in the form. If you already have the Virtual Appliance, move on to the next step.
- b. Please deploy and configure the Virtual Appliance as per the [guide found here](#).
- c. A service account with domain admin privileges will be required for the trial as well as a SQL Server service account with Sysadmin role assigned. This is only required for the trial to ensure ease of configuration/deployment – there is a full least privilege implementation available for production.

Note: The virtual appliance MUST be imported/configured and added to the network/domain prior to the first configuration session.

2.2 Manual Deployment (if virtual appliance deployment is not possible)

- a. Download Lepide DSP by clicking [here](#).
- b. Follow the short tutorial [here to prepare the server for Lepide DSP](#) (2 minutes).
- c. A service account with domain admin privileges will be required for the trial as well as a SQL Server service account with Sysadmin role assigned. This is only required for the trial to ensure ease of configuration/deployment – there is a full least privilege implementation available for production.

Note: The above steps MUST be completed prior to the first configuration session.

3. Platform Specific/Environment configuration

We may require some changes to be made within the target environment/s you wish to monitor, please review the below to ensure you can either:

- a. Have this completed by you/your team prior to the session
- b. Have this reviewed and authorization granted prior to the session
- c. Make arrangements for the correct team/department members to be available for the configuration session where we will need to make these changes

Platform	Guide	Completed yes/no
General Prerequisites for basic function (ports, service accounts, system requirements etc)	Please review sections 2.1-2.6 of the following guide	Yes/no
Active Directory / Group Policy / Exchange Auditing	Please review the following guide	Yes/no
