Introduction

Lepide Data Security Platform now enables users to audit any cloud platforms with an accessible log source, such as Box.com, Coda, etc. The procedure to add these components is simple. We have taken Box and Coda as two examples of how to add the required cloud component.

Adding a Box Cloud Account

Lepide Data Security Platform audits your Box account and provides you with insight into user interactions with the files and folders inside. Please follow the below steps to add your Box account to Lepide Data Security Platform:

1. Go to Component Management and click on Universal Audit to add your Box account.

2. In the next window, please give the authentication information.
Please enter the Server Name for your reference and the Access Token which you will need to generate from the Box Cloud portal.

These are the steps for generating the Access Token:

1. Log into the Box.com account that is to be audited.
2. Go to https://app.box.com/developers/console/app/876507/configuration
3. Click on “Generate Developer Token” Click on next. Paste it in the “Access Token” field with ‘Bearer’ as prefix on this page to validate the authentication. Put a space between Bearer and the Token number.
4. In the next window, please provide the column mapping information if required or proceed with the default values.
5. Click Next and Select your SQL settings in this window.
6. Next window is for Archive settings. Please select your SQL server and either create a new DB for the archiving or select an existing one.
7. You can set a schedule for archiving by clicking on the Weekly and Monthly tabs.
8. Click Finish to save the settings. You will get a popup to restart the software. Once you restart it, you would be able to see it under Component Management.

Viewing the Reports

The reports will be visible in the “All Environment Changes” under “States and Behavior”. Please filter the records based on Components at the top and select Box.com from the list as shown.
Creating a Schedule for the Reports

1. To create a schedule on the Box.com events, please go to the Schedule Report Option from the left and Click on the following icon.

2. This will open a different window where you need to select the “All Environment Changes" report and click Next.
3. In this window, please add Box.com from the tab “Component Name”. You can select multiple filters here based on Object Path, Object Type, Who, Operation and Criticality.
4. Set the Report Delivery Settings in the next window and select the Delivery Mechanism.
5. On the next window, please set the delivery schedule to Daily/Weekly/Monthly as shown in the picture.
6. Enter a Schedule Name in the text box and click Finish.
7. Your Schedule will be saved with the specified name in the Scheduled Reports.

Adding a Coda Cloud Account

Lepide Data Security Platform audits your Coda accounts and provides you with insight into user interactions with the files and folders inside. Please follow the below steps to add your Coda account to the Lepide Data Security Platform:

1. Go to Component Management and click on Universal Audit to add your Coda account.
2. In the next window, please give the authentication information.
Please enter the Server Name for your reference and the Access Token which you will need to generate from the Coda Cloud portal.

These are the steps for generating the Access Token:

1. Log into the Coda account that is to be audited.
2. Go to https://coda.io/account
3. Click on “Generate API Token” Click on next. Paste it in the “Access Token” field with ‘Bearer’ as prefix on this page to validate the authentication. Put a space between Bearer and the Token number.
4. In the next window, please provide the column mapping information if required or proceed with the default values.
1. Click Next and Select your SQL settings in this window.

2. Next window is for Archive settings. Please select your SQL server and either create a new DB for the archiving or select an existing one.
3. You can set a schedule for archiving by clicking on the Weekly and Monthly tabs.
4. Click Finish to save the settings. You will get a popup to restart the software. Once you restart it, you would be able to see it under Component Management.

Viewing the Reports

The reports will be visible in the “All Environment Changes” under “States and Behavior”. Please filter the records based on Components at the top and select Coda from the list as shown.
Creating a Schedule for the Reports

1. To create a schedule on the Coda events, please go to the Schedule Report Option from the left and Click on the following icon.
2. This will open a different window where you need to select the "All Environment Changes" report and click Next.

3. In this window, please add Coda from the tab “Component Name”. You can select multiple filters here based on Object Path, Object Type, Who, Operation and Criticality.
4. Set the Report Delivery Settings in the next window and select the Delivery Mechanism.
5. On the next window, please set the delivery schedule to Daily/Weekly/Monthly as shown in the picture.
6. Enter a Schedule Name in the text box and click Finish.
7. Your Schedule will be saved with the specified name in the Scheduled Reports.
Support
